HTML Tables Coding Exercises
All coding assignments are to be placed in your HTML folder.

Coding Assignment: t1.html
Create a webpage involving a table, using the following example as a template. You are welcome to customize the information presented as you see fit, but make sure the table has at least 5 columns and 4 rows!

Coding Assignment: t2.html
Create a webpage with a table that looks like the following. Again, you can customize the information presented if you would like.

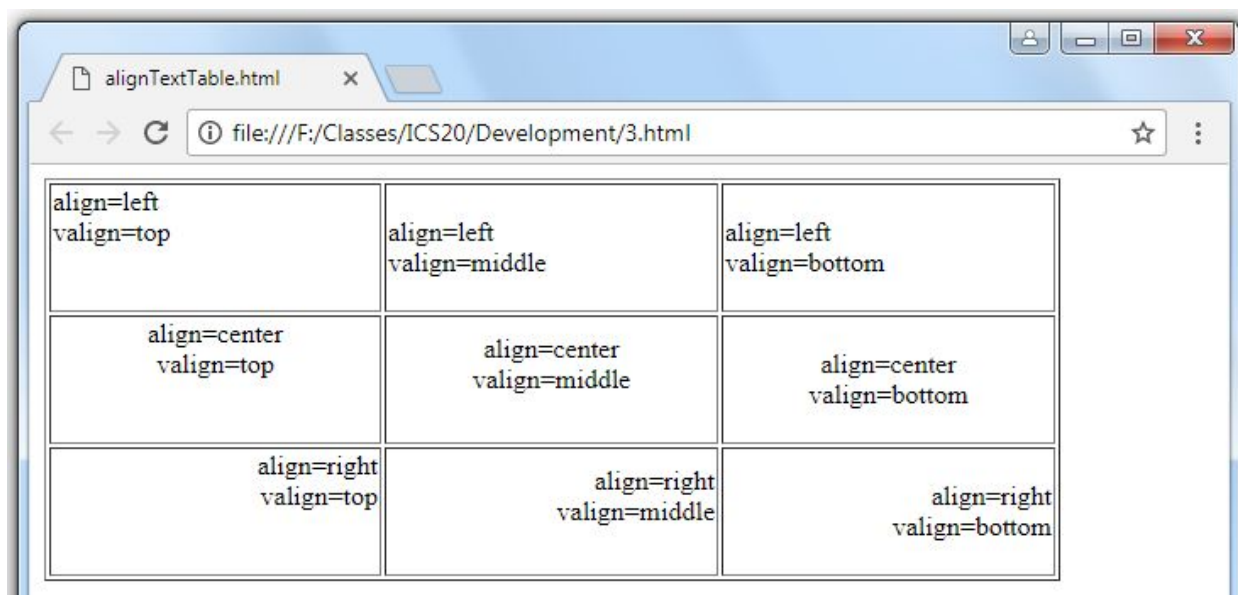

Some attributes you may need to modify:

border
cellspacing
cellpadding
width
bgcolor
align
valign

Coding Assignment: t3.html
Create a webpage with the following table. This is meant as a way to practice using the align and valign attributes.

align=left valign=top	align=left valign=middle	align=left valign=bottom
align=center valign=top	align=center valign=middle	align=center valign=bottom
align=right valign=top	align=right valign=middle	align=right valign=bottom

Coding Assignment: t4.html
Create a webpage involving a table, using the following example as a template. You are welcome to customize the information presented as you see fit, but make sure you experiments with both column spanning and row spanning!

NHL STATS			
Player	G	A	P
Crosby	1	3	4
Sundin	2	2	4
Skrovonek	4	4	8

Coding Assignment: t5.html
Create a webpage involving this exact table! Good luck, it will be challenging.

Quick	brown fox	jumps	
	lazy	dog	and
over the	then	it	fall
	prey to a lion
